Project Title: Fallingwater

I would like to build this site with multiple pages so that it is cleaner and more consistent with the topic itself. I will include a traditional navigation bar at the top of the page. There will be plenty of content, and especially images, for this site given that its significance. Pages will include:

- **Home Page/Introduction** – This page will introduce the Fallingwater house, giving slight context to its location and relevance in Frank Lloyd Wright's career.
- **History** – This page will give background on the reason for building this house and the clients.
- **Design** – This page will explain how Wright created the design for Fallingwater and what inspiration he used. It will briefly discuss materials and Wright's theme of connecting the inside to nature.
- **Construction** – This page will provide an overview of the construction challenges in creating this house from topography and structure to cost.
- **Sources** – This page will list references including Wikipedia and sources for images.
